To whom it may concern

This letter serves as a recommendation for **Zandtbox** in relation to the installation and implementation of a Learning Management System (LMS).

We engaged **Zandtbox**, represented by Karl Tischlhauser, to install and configure our LMS. The scope of work included system setup, customisation, user management, and initial support. The project was delivered professionally, within agreed timelines, and with a clear understanding of our organisational requirements.

Karl, acting on behalf of **Zandtbox**, demonstrated strong technical expertise and a practical, solutions-oriented approach throughout the engagement. He was responsive, easy to work with, and able to translate our needs into a functional and user-friendly system.

The implementation has significantly improved our training delivery and internal learning processes, providing a reliable platform for managing and tracking learning activities.

We were particularly impressed by:

- The ability of **Zandtbox** to configure the LMS to align with our specific needs
- Clear communication and ongoing support
- Efficient and dependable delivery of the project

We would confidently recommend **Zandtbox** to any organisation seeking LMS implementation or support services.

Should you require any further information, please feel free to contact me.

Yours sincerely,

Hamid I Yalcouye

Project Manager
